Subject: Re: Software Hosting Areement

Rick....you'll have our comments back by Friday. In principle it is ok.....I've marked up some changes.
However, I should reset your expectations in areas like restrictions on other 3rd parties......we'll generally
never restrict anything that will mean expanded business. And we will develop our own ASP initiative
aggressively....just so you know.

Ted

Subject: Software Hosting Areement

Hi Ted, I'm sure you have been very busy, I was out last week and
couldn't e-mail. We would like to get whatever arrangement PSDI is
comfortable with in place quickly. As you know any planning and
additional investment we make towards realizing the Hosting opportunity
depends on an arrangement with the software vendor (you).
If it would help I can be in Boston Friday 2/18 to finalize something.
I'll be at the NASA Facilities Workshop until Thursday in Maryland. Let
me know if you can send something ahead, and if the Boston meeting suits
your schedule and would be productive to this end.
Thanks
Rick
